“The major thing that impresses me more about the dairy insurance is the fact that we are able to protect our animals from the common causes of death and with the care package our animals stay healthy. This means that my animals will be healthy and even the calving intervals will reduce meaning more profit to me as a farmer.

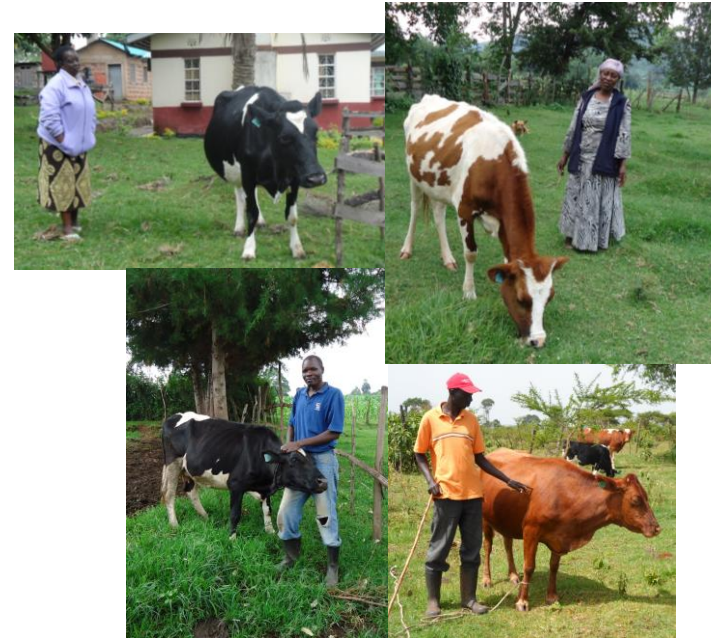

I know this scheme is going to transform our lives for the best.”

Miriam Jepkemboi Koech

Dairy Insurance

with Kilimo Salama

“Having my cows insured gives me **peace of mind** and it enables me to **invest more in my cows** because I know that if my cow dies, all my efforts will not be in vain because **I will be compensated**. Now I can easily **have my cows vaccinated** against ECF, Foot and Mouth, and Lumpy Skin. This **keeps them healthy**. I look forward to insuring more of my cows.” **Elizabeth Chepchirchir Murei**

Better. Simple. Life.

Farmer Testimonials

Dairy Insurance is linked to a Care Calendar with vaccines, tick control, deworming, and mineral supplements. Insurance is for coops, MFIs, banks, and large-scale farmers.

Dairy Insurance with Kilimo Salama

Naum J Ruto

“As a committed dairy farmer, dairy cows are my source of livelihood and when I heard of a scheme that could enable me protect my cows, I thought why not. At this moment I am peaceful knowing that in case something happens to my cow as long as it’s covered by the insurance I will be compensated and in no time I will be back in business. The vaccines have also been made accessible unlike before when we had to wait on the government to facilitate this. From the trainings that we will be given I will be a very knowledgeable farmer. I really thank Kilimo Salama for this.”

Jacob Kipteling Too

“As a farmer if I insure my cows I know I can not suffer 100% loss if my cow dies and I will be compensated as long as I follow all that is required by the insurance cover. The vaccinations have also been made easily available for my cows therefore my cow will stay healthy.”

Simeon Chepchosot

“The project has not been around for long so I don’t have much to say about it but I am waiting to see how it goes. I like the idea of trainings and I looking forward to learning more about dairy farming and how to handle the challenges that come with it.”

Kujurit Cheruiyot

“Through the eight years I have been involved in dairy farming, I have experienced losses especially from the death of my cows, so when I heard about the insurance for dairy cows from Kilimo salama and Tanykina Dairies I was so excited because I knew finally as a farmer I had a solution to the losses experienced after the death of a cow. The insurance also comes together with a care package that keeps my cows healthy and high producing. I am so grateful to Kilimo Salama for the Dairy insurance.”

Noelly Musimbi Maru

“What I like most about Tanykina Dairy Insurance is that it cushions’ us farmers against losses resulting from the death of a cow(s).The care package is also a good idea as it will help us farmers to manage our animals well. I wish you would include Mastitis among the causes of diseases that are covered as personally my cow is dry after suffering mastitis due to the death of the calf, this is beyond my control. Personally I know this scheme is going to help us a lot.”

Judith Lagat

“I just loved the whole insurance concept, my animal being protected as well taken care of well. Small holder farmers like myself are rarely involved in such like schemes and when I was approached in regards

to the insurance I was so excited and now I consider myself a recognized farmer. The rates are friendly and I hope you (Dairy insurance) are here to stay.”

David Sainah Komindany

“The convenience when it comes to vaccinations and the protection from losses is what I like more about the dairy insurance cover. I am looking forward to seeing how

the whole idea works as it’s the first one of its kind in this area.”

Joseph Kipsongok Lelei

“I am happy to have my cows insured, the rates are affordable and the cows can pay for their own premium as it’s deducted on the milk delivered. This scheme will also enable my cows to be vaccinated and therefore it means my animals will be healthy and more productive. What more can a farmer ask for?”
